

SAFE Campuses: National Outreach Campaign

This year, the **SAFE Campuses Initiative** is inviting all 4,500 collegiate institutions in the U.S. to engage in critical conversation about their campus response to the addiction fatality epidemic, with the goal of providing educational resources to students and faculty, offering technical assistance to new and existing collegiate recovery programs, and fostering inclusive campuses for students who struggle with substance use and co-occurring mental health.

Find out more at SAFEProject.us/Campuses

Addiction is a disease.
Recent data shows that
730,000 full-time college students

meet the criteria for alcohol use disorder while an additional

487,000
meet the criteria for drug use disorder.
