

BRIDGING PREVENTION AND RECOVERY

A SAFE Project Program

SAFE Project's *Bridging Prevention and Recovery* is a new evidence-based program model designed to provide substance use disorder professionals with a step-by-step process to facilitate sustainable integration of traditionally siloed approaches.

The *Bridging Prevention and Recovery* Program helps communities understand, develop, and apply approaches using hands-on tools to unite towards common community goals that prevent substances misuse and promote recovery. This program guides communities in developing a clear and supported path for youth prevention and recovery friendly supports by providing a road map that promotes wellness and resiliency and assists communities with recovering from the crushing impacts of substance use disorder.

You can expect to:

- Use place-based leadership to work past barriers in prevention and recovery supports and services.
- Fully utilize the strengths of both prevention and recovery experts.
- Connect your community needs and strengths with available funding sources, evidence-based practice, social determinants of health and quality of life indicators.
- Work in community prevention and recovery teams.
- Launch services and supports unique to your community with a plan for sustainability.
- Receive guided, action-oriented training and technical assistance from leaders in the field. Our technical assistance team will help you work through barriers.
- Master facilitation techniques and learn conflict resolution skills associated with prevention and recovery systems.

"You bridged the conversation between folks who often work on different ends of the spectrum. Prevention and recovery are the best allies for one another. That was something that drove through in all of this process." – BPR Participant

BRIDGING PREVENTION AND RECOVERY

Save the Dates! Be a Part of the Next Virtual Bridging Prevention and Recovery Cohort!

We are currently recruiting for communities who want to join our third cohort beginning in February 2021.

Please contact us at community@safeproject.us for further information.

Each module is structured in a learning cohort format, allowing prevention and recovery professionals from across the nation to participate together virtually. Community-based exercises will be assigned following each live module and one-on-one technical assistance will be available to each community. Participants must commit to attending all six cohort sessions and a minimum of four technical assistance sessions.

Participants who complete the cohort series will receive a completion certificate upon request and a free copy of SAFE Project's "Bridging Prevention and Recovery" Program Manual.

Who Should Attend?

Community involvement is critical to the success of this work, so in the spirit of uniting prevention and recovery systems, at least one representative from each sector who will be leading and facilitating community-based integration efforts should commit to attending all of the live sessions.

How to Register

Only 10 Community Spots Available Per Cohort!

Visit: safeproject.us/prevention-recovery

The cost of attendance is \$3,000 per community.

Each community slot must include one prevention and one recovery representative.

For registration questions, please contact community@safeproject.us.

About SAFE Project

SAFE Project is a national 501(c)3 nonprofit committed to overcoming the epidemic of addiction in the United States. Using a collaborative, multi-pronged and non-partisan approach, our key initiatives focus on SAFE Campuses, SAFE Communities, and SAFE Veterans. They are fueled by SAFE Project's six lines of operation: public awareness, full-spectrum prevention, prescriptions & medical response, law enforcement & criminal justice, treatment & recovery and family outreach & support. Thanks to the generosity of our donors and the support from our volunteers, SAFE turns hope into action through transformative programs, training, and technical assistance. For more information, visit safeproject.us.
